How do paper planes fly?

AI Overview

Paper aeroplanes fly by balancing four physical forces: thrust (forward push), lift (upward force), drag (air resistance) and weight (gravity).

Finding information online

Using the internet to find information can be a challenge. We need to think carefully about which information is helpful.

Stop

No.

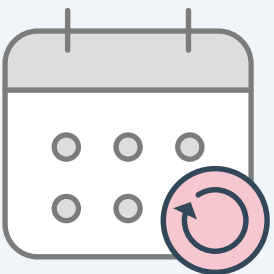

Say no

Tell

Staying safe online

Not all online content is made for children. If something online does not feel right, we should stop, say no and tell a trusted adult.

outdated

exaggerated

fake

Checking if it is misleading

Information is more reliable when we check the author, date and purpose, and compare more than one source.
